

In documents is used ____ to show that on this place will be used different data, for example identification number.

Example: Today is ____

Meaning: Today is Monday or today is Tuesday or today is today is Wednesday ...

In documents is used »« to show that text inside of »« will not ever change and it should not be modified. If it is »name.surname@gorenje.com« you can not ever use some other combination of characters like »surname_name@gorenje.com« but you do not need to show »«.

Example: This is email: »name.surname@gorenje.com«.

Meaning: This is email: name.surname@gorenje.com.

In documents is used () to show that text inside of () is not as important as other text and it should not be used in answers. It can be answered only after user asks for more informations about words before ().

Example: Click on Execute button (F8).

Meaning: Click on Execute button.

Question: What if I do not see Execute button?

Answer: You can also press F8.
