

Hisense Gorenje Europe, d.o.o. IT department

# OneDrive language settings

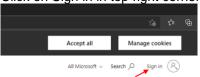

This document describes how to change OneDrive language settings from default to selected one. These settings apply both to OneDrive webpage and to online version of Office applications (**Word, Excel, PowerPoint**) that are used when editing a document directly from OneDrive website.

The OneDrive language is set in two steps:

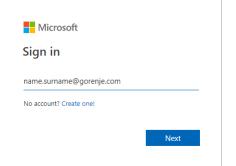

- **By your administrators** this was probably already done by your administrators; if it is not set, please contact your local IT support.
- By your personal preference on OneDrive please follow instructions in this document to configure language settings.

### 1 Configure the OneDrive language

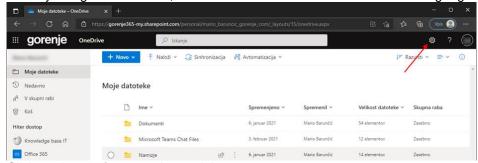

- Open a web browser, go to: https://onedrive.com
- 2. Click on Sign in in top right corner:

3. Use your gorenje.com username to sign in

4. When you sign to OneDrive, the default user interface is in Slovenian language:

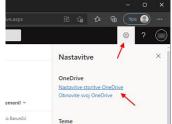

Click on the **settings** cog in top right corner.

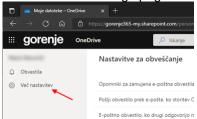

#### a **Hisense** company

5. Settings pane will open (Nastavitve)

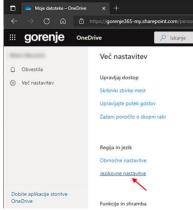

Click on OneDrive Settings (Nastavitve storitve OneDrive)

6. The OneDrive settings page:

Click on More settings (Več nastavitev)

7. More settings page opens:

Click on Language settings (Jezikovne nastavitve)

8. The Site Language Setings (Jeziki spletnega mesta) page:

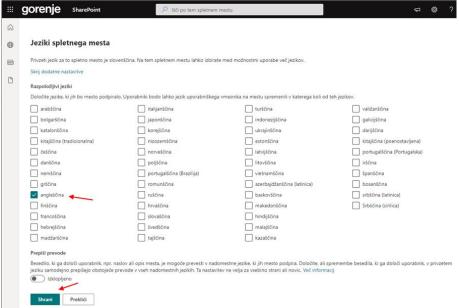

Click on Show additional settings (Pokaži dodatne nastavitve)

#### a **Hisense** company

9. Available languages (Razpoložljivi jeziki):

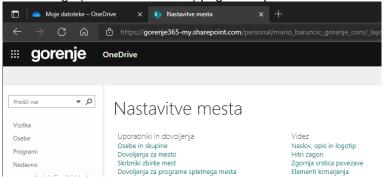

All available OneDrive language are listed here.

Make sure you select English (angleščina).

You might also select other languages, but make sure you do include English.

Translations of other language names are listed at the end of this document.

10. Site settings (Nastavitve mesta) page will open:

You can close the web browser now.

New settings should be applied within next 30 minutes.

If language settings do not change to English, please contact your IT support

### 2 Language names

### 2.1 Language names – Slovenian to English

#### 3 Additional info for Administrators

Check the user's settings in local on-premises Active directory:

PS C:\> get-aduser name.surname -property preferredLanguage|select name, preferredLanguage

name preferredLanguage

Name.surname en-US

You can set the PreferredLanguage with this command:

set-aduser -Identity name.surname -replace @{preferredLanguage="en-US"}

List of available language codes (for other languages) is published here:

https://docs.microsoft.com/en-us/cpp/c-runtime-library/country-region-strings?view=msvc-170

When you change the setting on on-premises Active directory, wait for the change to synchronize with Azure AD.

You can check user's settings in Azure AD with this command:

get-msoluser -UserPrincipalName name.surname@hisense.com|ft userPrincipalName, PreferredLanguage

UserPrincipalName PreferredLanguage

name.surname@hisense.com en-US
